### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1 of the specification, the status of serial number 10/226,828 has been updated by inserting after the file date on line 8; ---, now U.S. Patent 6,768,666 B2---.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of an element for reflecting or transmitting electromagnetic radiation having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including the grid structure of conductive strips and the plurality of active regions comprising a chalcogenide material, wherein the regions have structural states (as recited in claim 1). The purpose of the element is to modify the phase of incident electromagnetic radiation thereby providing control over a wide range of angles and spatial profiles in both reflection mode and transmitting mode. Therefore, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Specification***

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Information Disclosure Statement***

4. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following are U.S. Patents directed to various electro-optic devices wherein a characteristic of the optical wavelength is affected:

Uchida et al	U.S. Patent 3,661,441
Asahara et al	U.S. Patent 3,920,461
Geiger	U.S. Patent 5,299,054
Schmidt et al	U.S. Patent 6,236,493 B1
Hiraga et al	U.S. Patent 6,452,710 B1
Miura et al	U.S. Patent 6,728,154 B2

The Applicant's related application, now U.S. Patent 6,768,666 B2 (Tsu).
